### The leading fuel management company in the UK

Over 1.2 million fuel cards in the UK alone

Over 1.1 million fuel transactions per week - over 63 million a year

Over 7% of all UK fuel purchases made though Arval

Over 35,000 clients - including 160 large corporate (750+ vehicles)

# How it works

Fuel card allocated to vehicle or driver

You restrict driver's purchase (unleaded, diesel, oil etc.)

Driver pays with card - registration and mileage recorded

Mileage capture allows you to reclaim private mileage

Consolidated invoicing details individual transactions

You pay for all fuel purchased on the card at actual cost

## Mileage capture

**Automated process for re-charging drivers for private fuel**

**On-line or telephone reporting for drivers**

**Email or SMS reminders to drivers to ensure timely reporting**

**Pay the actual cost of fuel used**

**Reduce administration**

**Transparent policy  
Fair on you, fair on your drivers**

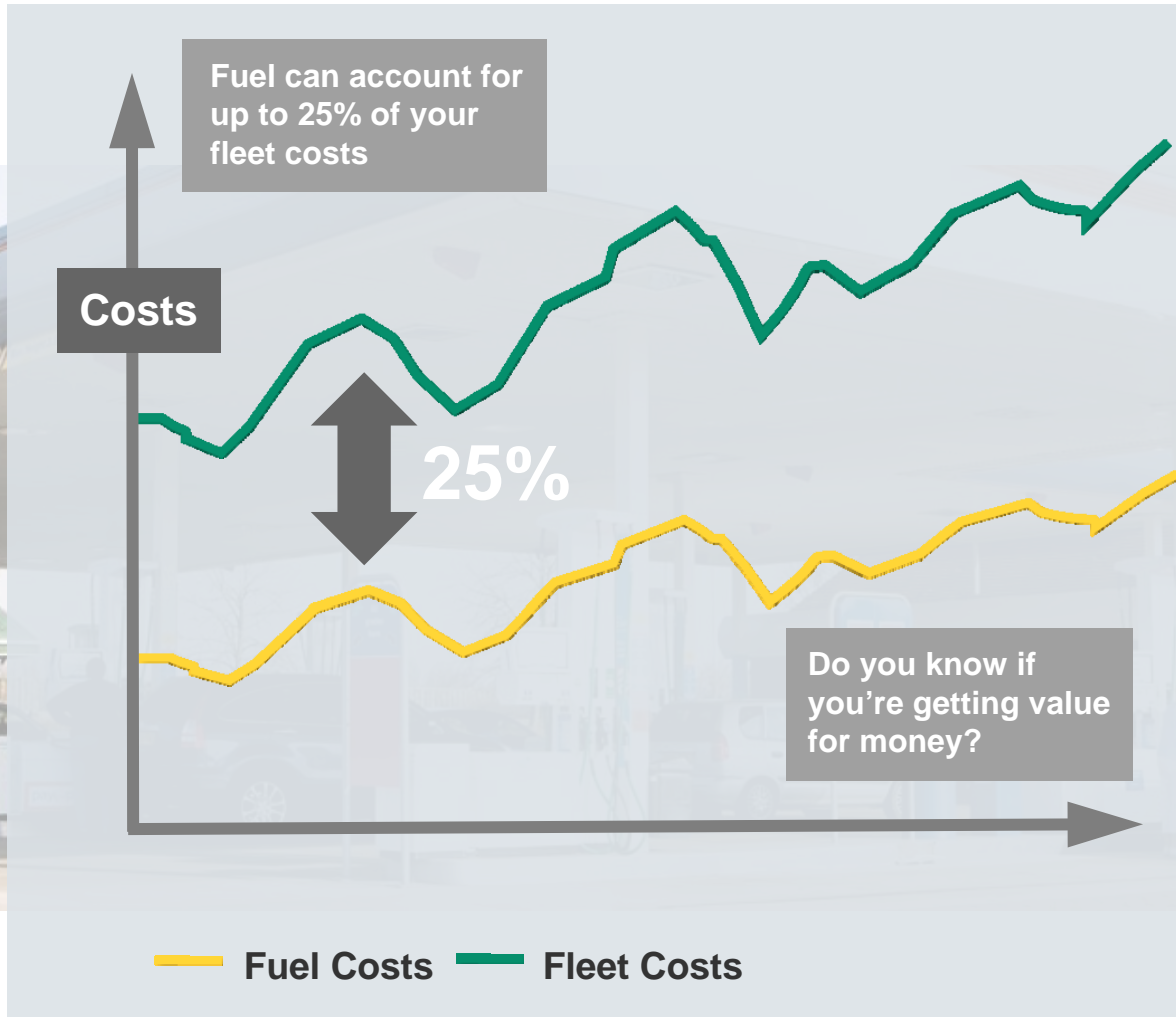

**Convenience plus audit trail**

**Facilitate timely reporting**

**Simple and easy process for drivers to complete**

# Why use Fuel Management?

# Why do 65% of fleet operators use a fuel card?

**Control**

**Cost reduction**

**Reduced administration**

**Security**

**Environmental**

**Convenience**
